

# Colorful vases

## (DIY - UPCYCLING)

### Supplies:

- Several bottles or jars of different sizes (ideally see-through glass)
- Acrylic paint in various colors (blue, green and white used in the instructions)
- Cups
- Brushes
- Plastic syringe
- Flower tubes

### Step by step set up:

**01.** Start by cleaning your jars and bottles with soapy water. Once cleaned, let them dry thoroughly.

**02.** Create your color palette. To obtain the desired color gradation, pour in the white first, then add the color one drop at a time. Add a small amount of water to dilute the color.

**03.** Using the plastic syringe to carefully pour the color into each bottle or jar, then rotate them to evenly apply the color.

**04.** Let your vases dry thoroughly and apply a second coat if necessary.

You will not be able to pour water directly into the vases but you can use a flower tube, which can easily be found at your local flower shop!
